

Technical Project Manager, specializing in  
Wastewater/Water Management (m/f)

Berlinwasser International AG is a joint stock company active in international water markets as one of Germany's leading service provider focussing on the management and operation of drinking water supply and wastewater disposal systems. Using public-private partnership models, Berlinwasser International AG offers extensive infrastructural and consulting competencies to investment and development projects all over the world. The company's services include the development and implementation of operations management and management contracts, consulting activities and collaboration with financial investors. BWI's portfolio includes concessions as well as BOT and TOT projects, the management of which is the responsibility of the company's headquarters in Berlin.

For our company in China we are looking for an experienced project manager with sound technical knowledge of technical project development as well as contract management for our projects in China.

Technical Project Manager, specializing in Wastewater/Water Management

For the following duties:

- Development of technical concepts and technical quotations for Concessions, Built-Operate-Transfer (BOT) projects, Transfer-Operate-Transfer (TOT) projects and operations contracts in the field of wastewater treatment plants and sewerage systems) as well as water supply (water treatment plants and networks)
- Assessment and evaluation of existing works and the development of technical and operational optimization concepts
- Assessment of operating costs and investment requirements and optimization thereof
- Contract Management of Concessions, BOT-, TOT and operations contracts

Your profile:

- Certified engineer, specializing in wastewater/water management, civil engineering or comparable specialization
- Work experience from international operations and privatization projects and/or sound knowledge of optimization of wastewater and water assets operation
- Sound knowledge of wastewater and water process technology and design
- Knowledge of contract management as well as technical proposal management
- fluent business English
- Interest to manage complex projects with an international team

Location: China

Start: immediate

We are offering you interesting tasks in the international field as well as a creative working atmosphere where entrepreneurial working is asked and supported. Sounds interesting? Please send us your complete application documents (informative cover letter, curricula vitae, testimonials, salary expectations, earliest possible starting date) only by email. Application documents, which are submitted in paper format, cannot be sent back.
